RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The RJ45 Snagless boot is made out of a soft PVC allowing it to fit to most cables and easy release. The boot is designed to cover the latch so that it does not get caught on cables when removing where other cables are present. The PVC is soft enough to press down to release the latch allowing connector to come out.
